

EZY-PAK™ #120

GENERAL PURPOSE PACKING

DESCRIPTION

EZY-PAK™ #120 is a general purpose packing compound recommended for hydrocarbon and aqueous services. It is an injectable packing material that can be pumped into internal voids in valves and other equipment with a high pressure lubricator. Under pressure, **EZY-PAK #120** will conform to the shape of any void and form a gasket or seal.

EZY-PAK #120 is formulated with hydrocarbon resistant vegetable oils, polymers, inert fillers and high temperature fibers blended to produce a dough-like packing compound. It is best pumped through an injection valve with a 1/8" or larger bore, but can also be pumped (with more effort) through giant buttonhead fittings.

- Vegetable Oil Base
- Color: Grey/Black
- Water Resistant
- Nonhardening
- Nontoxic
- Pumpable

APPLICATIONS

EZY-PAK #120 can be used in any application in which an injectable packing is desired to fill an internal void. It is hydrocarbon and water resistant and provides excellent sealing capacity when injected under pressure into valve bonnets, stuffing boxes, and other areas requiring packing.
