

Thinking Green? **GO yellow!**

JET-LUBE® ECF Environmental Compound Formula

Being green is one thing, but being approved Yellow by SFT (Norway) and CEFAS Classification E (United Kingdom and Netherlands) is a much greater challenge. Downhole, topside, or subsea, Jet-Lube offers a full line of biodegradable, bioaccumulation-free performance thread compounds, greases, and lubricants. You don't have to wait or be told to "go green." And you don't have to sacrifice top performance. GO YELLOW with Jet-Lube.

If it carries the Jet-Lube ECF label, it exceeds the toughest environmental and performance requirements to date.

Metal-Free and Extreme-Temperature Thread Compounds

RUN-N-SEAL® ECF

A high-pressure sealant alternative for API-Modified for non-premium connections.

SEAL-GUARD™ ECF

Specifically formulated for metal-to-metal premium threads and high-alloy steel materials.

NCS-30™ ECF

A premium drill string compound with excellent adhesion and water resistance.

Workover, Subsea, and Open-Gear Greases and Lubricants

JACKING SYSTEM GREASE™ ECF

For jacking systems, slides, cantilever-type rigs, and any heavily loaded gear equipment.

WIRE LINE LUBRICANT ECF

A new-generation formula to extend and protect your slick braided and electric wireline.

ALCO-EP™ ECF

A long-lasting highly water resistant multi-purpose grease. Excellent for subsea as well as topside moving components.
